HealthiBetic  
**healthifeet™**

HealthiBetic HealthiFeet™ is a topical cream clinically proven to relieve foot discomfort associated with poor circulation.

**Warms cold feet.** L-Arginine, a naturally occurring amino acid used to regulate circulation, restores temperature to cold feet keeping them warm and healthy.

**Soothes foot discomfort.** Improved circulation relieves numbness and discomfort in feet leaving them relaxed and restored.

**Moisturizes dry skin.** Nourishing cream, enriched with vitamins and nutrients, penetrates dry skin leaving it soft and comfortable.

**Directions:** Simply rub cream into feet for five minutes, liberally covering the entire foot, top and bottom. Apply the cream twice daily, morning and evening, for seven days and then once daily to maintain soft, healthy feet.

Taking care of your feet is a very important part of overall health. Increased circulation in the feet of people with diabetes may help to prevent more severe foot complications in the future.
